Capucine VANDEBROUCK

French artist

Born in 1985, lives and works in Strasbourg.

Capucine Vandebrouck approaches her creations using natural materials that are inherently fluid, even ephemeral. Perpetually shifting from one state to another, it is this inconstancy that inspires the artist, who adapts to the impermanence of materials over time. Temporality plays a significant role in her process, as she captures fleeting moments in her works. This exhibition presents works from the series «The Memory of Water,» where she sensitively and poetically explores this element in its physical metamorphoses, from gas and mist to ice and liquid.

The works are revealed through the photogram process. The water is pierced by light, the moment freezes, and leaves its imprint on the photosensitive paper. The artist employs a system that allows her to capture the movements of water in its liquid state and the ripples that propagate across its surface. Using the same technique, she illuminates the outline of each micro-droplet, tracing its silhouette on the paper, creating a mist-like effect. Capucine Vandebrouck captures fleeting states and ephemeral flows in her works. She always seeks to evoke a sense of wonder, surprise, and curiosity, for it is through this process that our perceptions of the invisible are broadened.
